

TILE EASY

INTERLOCKING FLOOR TILES

The benefits of Tile Easy porcelain floors

The virtues of porcelain tile for any household are well known. Porcelain tile is arguable the most durable and easy to maintain flooring on the market. It can handle even the highest traffic locations without showing much wear.

Spills, cracking and chips and other accidents are not an issue with Konekt flooring. Modern design advantages are undeniable with modern printing techniques it gives you a wealth of aesthetic options for creating a floor that is totally unique to your living area. For example, there are now porcelain tiles that look so much like exotic hardwood planks that you will have trouble telling the difference.

Costs

The costs of a ceramic or porcelain tile floor are comprised of two elements:

- the price of the ceramic or porcelain tile.
- the cost of installation labour.

When purchased at tile specialty outlets tiles can range from less than \$10 per square mt for plain solid-colour ceramic (not porcelain) tiles to just under \$100 per square mt. You may also need to add subfloor preparation materials costs.

At the high end, prices rival that of natural stone tiles, but very elegant and serviceable porcelain tiles are available in the \$50 to \$300 per square mt range plus installation costs.

Porcelain tile installation costs can vary widely, too, depending on the size of the job, geographic location, and even where your building is located. Even when installation services are purchased from a national retailer, labour costs in some regions of the country may be much higher than those in another region.

You could pay from \$60 m2 to \$110 m2 for porcelain tile installation labour costs depending on the size of the tile. So not only can ceramic or porcelain tile installation be slow labour-intensive flooring to install, but it can also work out very very expensive!

There is a solution and DIYers, handy person can enjoy considerable savings and time by doing this work themselves since roughly half the cost of the tile floor is in the installation labour.

Tile Easy.... *tiling made easy* porcelain tile flooring is easy to install and super-fast.

- Most people can have their lounge or kitchen areas installed on 1 day...walk on ready.
- No need to vacate your area or move furniture out of the room.
- No mess grouting systems

Tile Easy porcelain tile compared to floating timber floors.

Tile Easy porcelain tile flooring and laminate timber flooring have one thing in common, they are quick to install. However modern porcelain tiles can now be shaped and printed to look like many different species of hardwood flooring.

Tile Easy porcelain flooring are a little more expensive than some laminate flooring **but** the extra cost is visually clear to be seen in the quality of finish.

Porcelain floors are **the best** when it comes to appearance and maintenance, ask any real estate agent, they say that porcelain flooring add value to your home.

Maintenance

Tile Easy porcelain tile floors are one of the easiest if not the easiest floors to maintain not like most laminates that can scratch, dent and stain over the course of its life.

With Tile Easy porcelain tile flooring the floor will require only regular sweeping and damp mopping to remove dirt and loose debris.

Because of this, Tile Easy porcelain tile flooring is a great choice for high traffic flooring situations.

Households, commercial retail shops, hotels, hospitals car showrooms....and alfresco / balcony areas.

Drawbacks..... is there any!!!

The drawbacks of porcelain tile flooring are minimal. Most often cited is that tiles are cold and hard.....but not with Tile Easy porcelain tile flooring. The system sits on a pocket of air and is not directly adhered to the cold concrete. With its patent interlocking tray, it is like you are walking on timber or cork. For winter months you can install a radiant-heat systems below the floor at initial installation stage.

Advantages..... yes, there are many!!

- ✓ Super-fast to install..... great for DIY
- ✓ Will **not crack** if substrate moves.
- ✓ Incredibly good impact resistance.
- ✓ Can be install over most level existing subfloors.
- ✓ No maintenance.... just mop over.
- ✓ Quiet.....noise absorbing that is great for high rise units.
- ✓ Super easy no mess grout systems
- ✓ Quality finish of porcelain
- ✓ Easy to remove at end of décor life with a resale value.
- ✓ Balcony / alfresco areas
